Relevant Experience

Mobile Engineer · **Ruvik Group** Mar 2023 — Present

- Lead development of a multi-platform mobile and web app that lets users create, view, and rate photos based on individual preferences
- Translate high-fidelity mockups into responsive mobile code that performs across devices and screen sizes, backed by comprehensive functionality tests
- Integrate secure payment gateways, behavioural tracking, and analytics tools to improve monetisation and drive data-informed decisions

Software Engineer · **Oben Health** Aug 2022 — Aug 2023

- Developed a mobile solution empowering users to curb, reverse, and prevent adverse health conditions
- Built a Flutter web dashboard enabling health coaches to efficiently support their clients
- Rebuilt the Node.js backend for seamless registration and onboarding, with improved API endpoints for the mobile app
- Created and maintained an in-house Flutter/Dart package used by the entire team

Flutter Engineer · **BroadSpectrum Digital Payments** Jan 2022 — Mar 2023

- Led development of a farmer data collection and aggregation solution impacting over 1.5 million farmers in Ghana
- Revamped the produce collection system and integrated it with the government's farmer subsidy programme
- Mentored junior engineers and maintained a widely used in-house Flutter/Dart package

Lead Flutter Engineer · **Walulel** Jan 2021 — Feb 2022

- Led development of the WaCommunicate admin and free user apps for users in Ghana and the UK
- Authored UI and functionality tests to ensure code quality and reliability
- Managed deployment, publishing, and versioning on the App Store and Google Play

Mobile Engineer · **Upwork** Jan 2021 — Feb 2022

- Maintained and developed key features for an existing restaurant application
- Built responsive mobile and web experiences with Flutter and Dart from high-fidelity mockups

Mobile Engineer · **Interactive Edge** Mar 2018 — Feb 2020

- Designed and developed mobile apps for diverse clients using Kotlin, Java, and Firebase in Agile/Scrum/Kanban teams
- Delivered against product roadmap milestones and strict release plans, and optimised the performance of existing solutions

Skills

Languages

Dart, Kotlin, Swift, Java, JavaScript, SQL

Frameworks & Platforms

Flutter, Android, iOS, Node.js, Firebase

Tools & Practices

Git, Figma, Adobe XD, Testing, Debugging, App Store & Google Play releases
